

MODULAR CONTEMPORARY WALLING

Moodul.  
So much more than a wall.

# Moodul

So much more than a wall

Moodul is a contemporary modular building block, innovatively designed to allow the creation of stunning features in your garden. Moodul adds a new dimension to your landscaping project and building with Moodul is as simple as child's play!

Moodul is so much more than an ordinary building block. With Moodul you can create a structure that's as functional or as artistic as you want - from a simple wall to an attractive planter, from a basic bench to a complete outdoor room.

And Moodul lets you go even further with a range of add-on accessories. So you can easily hang a flower box on your wall, build a shelf or create seating, all without drilling.

Fancy a change? Simply move flower box, shelf or seating around, season to season. Look through our brochure and let Moodul inspire you.

A Moodul wall is made up of two simple elements – a 60x30x9cm (LxWxD) walling block and a 60x30x7.5cm (LxWxD) cover stone both available in black and grey.

So whether you prefer a grey wall with a black coping, a black wall with a grey coping or vice versa the choice is yours. You also have the option to alternate colours with banding.

Building with Moodul building blocks is very simple and the creation of garden features such as planters, fire pits and dwarf walling can be done simply by stacking the blocks.

This allows you the freedom to change your gardens structure from time to time by moving or redesigning features. For structural walls above one metre in height it is advisable to use mortar or building block adhesive. For more information see the Pavestone Installation & Maintenance Guide on our website [www.pavestone.co.uk/technical-information](http://www.pavestone.co.uk/technical-information).

## Heat-treated ash: high quality wood that's environmentally friendly too

Moodul wooden bench and shelving accessories are made from ash wood which is heat-treated to a temperature of 215°C using a steam process to prevent the wood cracking or splitting as it weathers.

This thermal treatment gives the wood the uniformity and durability of tropical hardwood and, over time, its warm hues can be preserved by varnishing or oil treating: alternatively untreated it will gracefully turn silver. We use ash because it's one of our fastest-growing native species unlike the slow-growing hardwood harvested from rainforest clearances. So Moodul is an environmentally friendly choice too.

# Moodul Accessories

The ultimate in contemporary seating, a Moodul bench seamlessly suspended against a Moodul wall, invites casual seating. A place to sit and contemplate or maybe read a book.

Simply hang up a few flower-filled pots to add colour and life to your wall. Why not add Moodul Cubid outdoor LED lighting to illuminate your new surroundings in a fashion that's stylish, economic and sustainable? Moodul accessories simply hook into place with no need for drilling.

## Stainless steel universal hook

- Can be attached anywhere on the wall
- Rust free
- Available in packs of five with five M5x16 stainless steel wood screws
- 8kg maximum load capacity

## Moodul Cubid in-lite

- Simple cube shape in silver-coated aluminium
- Provides 12V low voltage warm white light
- 240V transformer for mains connection
- Attaches to wall with integrated stainless steel hook

## Moodul Bench

- 120cm x 45cm x 4cm (LxWxD)
- Heat-treated ash
- Stainless steel or heat-treated ash support brackets
- 220kg maximum load capacity
- Can be attached to the wall at 60cm intervals

# Moodul Accessories

Imagine using an outside wall just like a wall inside your home? With Moodul shelves and decorative bands, that's exactly what you can do. So it not only looks good but it's just as practical too.

## Decorative band

- 180cm x 3cm x 4cm (LxWxD)
- Stainless steel or heat-treated ash
- Fixes neatly into the wall channels

## In-lite Curve Module

- Decorative wall lamp in silver-coated aluminium
- Provides 12V low voltage warm white light
- 240V transformer for mains connection
- Fixes to the wall with integral stainless steel hook

## Moodul Shelves

- 120cm x 30cm x 2.5cm (LxWxD)
- 60cm x 30cm x 2.5cm (LxWxD)
- Heat-treated ash
- Stainless steel or heat-treated ash supports
- 50kg maximum load capacity
- Can be attached anywhere on the wall

Mystica Polaris

Manhattan Black

Kera Linea Pearl Grey

Sable Diana

To see our full range ask your stockist for the Pavestone Landscaping Brochure or visit [www.pavestone.co.uk](http://www.pavestone.co.uk)

## Let Moodul free your creative spirit

Moodul is a really rewarding material to work with. In a wall, its long open joints give your wall an elegant character with intriguing see-through details at eye level. It's also ideal for making a design statement that's as functional as it is attractive. What will it inspire you to create? Maybe a bench or two across a corner alcove, a carefully-placed planter, a warming brazier, a barbeque or even a charming set of steps?

Available in contrasting but complementary shades of black and grey.

*Attractive facade with see-through eye level detail*

## Moodul makes everything effortless

Whatever you build with Moodul, it couldn't be easier. Simply align the blocks and mortar or use a landscape block adhesive. If you leave the outer edges un-mortared, the inner sections of the wall remain accessible, allowing you to pull through lighting cables for example.

Discover how easy it is to build with Moodul modular walling by viewing the Pavestone Installation & Maintenance Guide at [www.pavestone.co.uk/technical-information](http://www.pavestone.co.uk/technical-information)
